Studiengang
Master Technology of Circular
Economy**

(PO 2024)

Hochschule Emden/Leer
Fachbereich Technik
Abteilung Naturwissenschaftliche Technik

(Stand: 8. August 2024)

Inhaltsverzeichnis

1 Abkürzungen der Studiengänge des Fachbereichs Technik	3
2 Modulverzeichnis	4
2.1 Pflichtmodule	5
Circular Economy Project	5
Introduction to Circular Economy	7
Masterarbeit	9
2.2 Wahlpflichtmodule	11
WPM Advanced Topics in Technology of Circular Economy 1	11
WPM Advanced Topics in Technology of Circular Economy 2	13
WPM Biodegradability and Environmental Impact	15
WPM Biopolymers	17
WPM Energies and materials in biotechnology	19
WPM Modelling and Simulation	21
WPM Recovery of Recyclable Materials	22
WPM Soil remediation	23
WPM Solid Waste and Recycling	24
WPM Water Reuse	26

1 Abkürzungen der Studiengänge des Fachbereichs Technik

Abteilung Elektrotechnik und Informatik

BET	Bachelor Elektrotechnik
BETPV	Bachelor Elektrotechnik im Praxisverbund
BI	Bachelor Informatik
BIPV	Bachelor Informatik im Praxisverbund
BMT	Bachelor Medientechnik
BOMI	Bachelor Medieninformatik (Online)
BORE	Bachelor Regenerative Energien (Online)
BOWI	Bachelor Wirtschaftsinformatik (Online)
MII	Master Industrial Informatics
MOMI	Master Medieninformatik (Online)

Abteilung Maschinenbau

BIBS	Bachelor Industrial and Business Systems
BMD	Bachelor Maschinenbau und Design
BMDPV	Bachelor Maschinenbau und Design im Praxisverbund
BNPM	Bachelor Nachhaltige Produktentwicklung im Maschinenbau
MBIDA	Master Business Intelligence and Data Analytics
MMB	Master Maschinenbau
MTM	Master Technical Management

Abteilung Naturwissenschaftliche Technik

BBT	Bachelor Biotechnologie
BBTBI	Bachelor Biotechnologie/Bioinformatik
BCTUT	Bachelor Chemietechnik/Umwelttechnik
BEEEE	Bachelor Erneuerbare Energien und Energieeffizienz
BEP	Bachelor Engineering Physics
BEPPV	Bachelor Engineering Physics im Praxisverbund
BNPT	Bachelor Nachhaltige Prozesstechnologie
BNPTPV	Bachelor Nachhaltige Prozesstechnologie im Praxisverbund
BSES	Bachelor Sustainable Energy Systems
MALS	Master Applied Life Sciences
MEP	Master Engineering Physics
MTCE	Master Technology of Circular Economy

2 Modulverzeichnis

2.1 Pflichtmodule

Modulbezeichnung <i>Module</i>	Circular Economy Project
Semester (Häufigkeit) <i>Semester (frequency)</i>	1 (jedes Wintersemester) (<i>every winter semester</i>)
ECTS-Punkte (Dauer) <i>ECTS (duration)</i>	6 (1 Semester)
Art <i>Method of Examination</i>	Pflichtmodul (<i>compulsory module</i>)
Sprache(n) <i>Language(s)</i>	English
Studentische Arbeitsbelastung <i>Student's Workload</i>	30 h Kontaktzeit + 150 h Selbststudium <i>30 h contact time + 150 h self-study</i>
Voraussetzungen (laut MPO) <i>Entry Requirements (MPO)</i>	none
Empf. Voraussetzungen <i>Recommended Requirements</i>	none
Verwendbarkeit <i>Applicability</i>	MTCE
Prüfungsart und -dauer <i>Type/Duration of Assessment</i>	project report, approx. 2000 words and approx. 6 tables or figures (Prüfungsleistung, graded exam)
Lehr- und Lernmethoden <i>Teaching Method</i>	seminar, group work
Modulverantwortlicher <i>Module Coordinator</i>	M. Rüschen gen. Klaas
Qualifikationsziele <i>Aims and Objectives</i> After completion of this course, the students have ...	<ul style="list-style-type: none"> • dealt in depth with a special topic in the field of circular economy, • independently compiled (scientific) information and used the knowledge gained from it used the knowledge gained for the project, • applied scientific methods to present and discuss the results obtained, and discuss, <p>by ...</p> <ul style="list-style-type: none"> • independently planning the necessary milestones to reach the project goal, • dividing and reuniting the necessary work packages in the team, and performing any necessary correction loops, • evaluating/merging the results and presenting/illustrating them accordingly, <p>in order to ...</p> <ul style="list-style-type: none"> • be able to design and work on a scientific task/question by themselves, • independently estimate and control the required time management, • present the results in a scientific context, to present them and to discuss them further (in a scientific circle).
Lehrinhalte <i>Course content</i> Project management, literature research, scientific communication and presentation	
Literatur <i>Literature</i> Literature on the circular economy (depending on the project topic)	
Lehrveranstaltungen <i>Courses</i>	

Dozent <i>Lecturer</i>	Titel der Lehrveranstaltung <i>Course Title</i>	SWS <i>SPPW</i>
all lectures in the masters course	Circular economy project	4

Modulbezeichnung <i>Module</i>	Introduction to Circular Economy
Modulbezeichnung (eng.)	Introduction to Circular Economy
Semester (Häufigkeit) <i>Semester (frequency)</i>	1 (jedes Wintersemester) (<i>every winter semester</i>)
ECTS-Punkte (Dauer) <i>ECTS (duration)</i>	6 (1 Semester)
Art <i>Method of Examination</i>	Pflichtmodul (<i>compulsory module</i>)
Sprache(n) <i>Language(s)</i>	English
Studentische Arbeitsbelastung <i>Student's Workload</i>	60 h Kontaktzeit + 120 h Selbststudium <i>60 h contact time + 120 h self-study</i>
Voraussetzungen (laut MPO) <i>Entry Requirements (MPO)</i>	none
Empf. Voraussetzungen <i>Recommended Requirements</i>	none
Verwendbarkeit <i>Applicability</i>	MTCE
Prüfungsart und -dauer <i>Type/Duration of Assessment</i>	Lecture: written exam 1,5h or oral exam, Seminar: presentation
Lehr- und Lernmethoden <i>Teaching Method</i>	Lecture, seminar
Modulverantwortlicher <i>Module Coordinator</i>	S. Steinigeweg
Qualifikationsziele <i>Aims and Objectives</i>	
At the end of the module students will be able to	
<ul style="list-style-type: none"> • classify CE as part of sustainable development • present the current status and developments in Europe and the world • Describe technical solutions to implement CE 	
by	
<ul style="list-style-type: none"> • identification of options and barriers to implement CE • apply evaluation approaches (technical, economic, environmental) of CE processes. 	
in order to	
<ul style="list-style-type: none"> • enable the use of CE technologies • develop and implement CE compliant processes • introduce CE in companies 	
Lehrinhalte <i>Course content</i>	
CE is discussed as a concept for achieving SDGs. In addition to administrative and legal framework conditions, the various technologies in particular are presented in a comparative manner. The interdisciplinary concept of CE, which goes beyond pure recycling, is discussed. Practical studies and examples from industry will be used to show how CE can be introduced in a company. In addition to technical requirements, particular attention is paid to economic and ecological factors.

Empf. Voraussetzungen <i>Recommended Requirements</i>	none
Verwendbarkeit <i>Applicability</i>	MTCE
Prüfungsart und -dauer <i>Type/Duration of Assessment</i>	Schriftliche Dokumentation und mündliche Präsentation
Lehr- und Lernmethoden <i>Teaching Method</i>	Projekt (<i>project</i>)
Modulverantwortlicher <i>Module Coordinator</i>	Alle Professor*Innen/Dozierenden
Qualifikationsziele <i>Aims and Objectives</i>	
After successful completion of the master's thesis,	
<ul style="list-style-type: none"> • students can independently solve a given practice-oriented problem from the subject area within a given period of time • be able to act and decide competently in a typical situation of everyday working life 	
By ... <ul style="list-style-type: none"> • analyze and modularize the task/problem • apply scientific and practical methods to solve individual modules • assemble the sub-modules and check the function of the overall system 	
In order to use it later ... <ul style="list-style-type: none"> • to work on job-specific problems/tasks 	
Lehrinhalte <i>Course content</i>	
The master's thesis is an independent achievement with a theoretical, constructive, experimental, model-building or any other scientific/engineering task with a detailed written description and explanation of its solution. In technically suitable cases, it can also be a written term paper with specialist literary content. The master thesis can also be carried out in industrial companies, research institutes or working groups of the university.

R. Habermann	Lecture Solid Waste and Recycling	2
R. Habermann	Project Solid Waste and Recycling	2

Modulbezeichnung <i>Module</i>	Water Reuse
Semester (Häufigkeit) <i>Semester (frequency)</i>	WPM (nach Bedarf) (<i>as required</i>)
ECTS-Punkte (Dauer) <i>ECTS (duration)</i>	6 (1 Semester)
Art <i>Method of Examination</i>	Wahlpflichtmodul (<i>compulsory elective module</i>)
Sprache(n) <i>Language(s)</i>	English
Studentische Arbeitsbelastung <i>Student's Workload</i>	60 h Kontaktzeit + 120 h Selbststudium 60 h contact time + 120 h self-study
Voraussetzungen (laut MPO) <i>Entry Requirements (MPO)</i>	none
Empf. Voraussetzungen <i>Recommended Requirements</i>	none
Verwendbarkeit <i>Applicability</i>	MTCE
Prüfungsart und -dauer <i>Type/Duration of Assessment</i>	(K1+R)/K2 + EA
Lehr- und Lernmethoden <i>Teaching Method</i>	Lecture and practical course
Modulverantwortlicher <i>Module Coordinator</i>	G. Illing
Qualifikationsziele <i>Aims and Objectives</i>	
After completing the module, students will be able to ...	
<ul style="list-style-type: none"> • differentiate between impurities in used water and methods of water recycling • choose suitable methods, materials and technologies and combine machinery for specific cleaning tasks • to calculate important parameters in water cleaning technology • to combine water cleaning technologies to meet the requirements 	
by ...	
<ul style="list-style-type: none"> • using, applying and combining water cleaning and knowledge provided • using flowcharts, choice of water treatment technology, assessment of water types, calculating of specific material-constants • design and application to specific problems, calculating group discussion and project work 	
in order to ...	
<ul style="list-style-type: none"> • be able to select suitable design variants for selected areas of application • to perform calculations to assess the scope and efficiency of water treatment plants and to combine different water treatment processes • to maintain the efficiency of water treatment processes 	
Lehrinhalte <i>Course content</i>	
Challenges for recycling and reuse of water. Basic water cleaning processes including filter technologies, membrane filtration and reverse osmosis. Concepts for the description of molecular transport models in membranes, characterisation of membranes, materials, processing and membrane modules. Application of membrane processes and calculations to evaluate the performance. Challenges in practical operation. Use of new technologies for disinfection, removal of trace substances and particles.
