First Business Language, Level 1		5.0	4
<p>Goals of Competency: The module of Language 1 offers an introduction in the respective Business Language. The students will acquire fundamental business terminology in the language to understand and to be able to apply fundamental business teachings to communicate within their system, so that the company or organization and its immediate surroundings can be described in clear language. The module enables students to; for example, recognize characteristics of the different legal forms of business and enable them to describe the difference between them. Another important aspect apart from conveying language competencies is the development of analytical skills regarding the differences between national and international management. Teaching Contents: Language 1 offers an initiation to the world of business, its legal and organizational structures, and the tasks of management for such basic questions as operation funding. The students will learn the terminology and linguistic possibilities for the presentation and description of these fields. For this purpose, depending on the requirements, corresponding linguistic structures and linguistic rules will be repeated or newly trained.</p>
